CHAPTER 2: SUPPLY CHAIN MANAGEMENT FRAMEWORK

PART 1: Demand Management System

1. Introduction

- 1.1. The Accounting Officer must establish and implement an appropriate demand management system in order to ensure that the resources required by the municipality support its operational commitments and its strategic goals outlined in the Integrated Development Plan.
- 1.2. Demand Management is the first element of the SCM function. The objective is to ensure that the resources required to fulfil the needs identified in the Integrated Development Plan (IDP) of SDM are delivered at the right time, price and place and that the quantity and quality will satisfy those needs of SDM.
- 1.3. The SDM's Integrated Development Plan (IDP) is a comprehensive strategy document setting out how the municipality intends to tackle its developmental challenges in a financial year. It is on the basis of the IDP that the resources of the municipality will be allocated and on which the budget is based.
- 1.4. Demand management within SCM forms an integral part of a series of activities that will contribute to achieving the measured goals of the institution by ensuring that goods, works or services are delivered as originally envisaged; with a reliable standard of quality and to the satisfaction of end-users. Correct implementation also ensures that, controls exist for management to detect variances early and rectify them in a planned and orderly manner and to foster a culture of compliance, thereby assisting management to achieve its goals and satisfy the executive and general public.

1.1. The Demand Management System must-

- 1.1.1. Include timely planning and management processes to ensure that all goods and services required by the municipality are quantified, budgeted for and timely and effectively delivered at the right locations and at the critical delivery dates, and are of the appropriate quality and quantity at a fair cost;
- 1.1.2. Take in account any benefits of economies of scale that may be derived in the case of acquisitions of a repetitive nature (such as long term contracts);
- 1.1.3. Provide for the compilation of required specifications to ensure that its needs are met; and undertake appropriate industry analysis and research to ensure that innovations

and technological benefits are maximised to the extent appropriate and within the available resources.

2. Steps To Be Implemented For Effective Demand Management System.

2.1. Participation in the strategic planning process

2.1.1. As part of the strategic planning exercise of SDM, the various functions to be executed must be identified. Pursuant thereto, it is necessary to determine the different resources required to execute the identified functions, i.e. water services, sanitation, refuse removal, electrical, etc. These resources must be budgeted for. It is of vital importance to know, even at this stage, the estimated costs of the required resources, including the estimated costs of the required goods, works or services.

2.1.2. Demand management must be co-ordinated by SCM officials in consultation with end-users. This includes a detailed analysis of the goods, works or services required, such as:-

2.1.2.1. The scope of the work to be executed;

2.1.2.2. The time required to complete the project; and

2.1.2.3. The material, resources, equipment required to execute the project.

2.1.3. The outcome of this activity should be a detailed planning document that outlines what goods, works or services should be procured, the manner in which they should be procured as well as the timelines to execute the procurement functions.

2.2. Procurement planning

2.2.1. Procurement planning should take place at the beginning of the financial year when the SDM's IDP, SDBIP and annual budget have been approved. Procurement plans cannot be developed in isolation; it should instead form part of the SDM's and other functional strategies. The SCM Unit must perform hand-in-hand with End-End-user

departments / directorates in the formulation of procurement plans through a Cross Functional Sourcing Team.

2.3. Analysis of the goods, works or services required

- 2.3.1. During the strategic planning phase of the SDM, the goods, works or services required to execute the identified functions are determined. The SCM Unit should assist the process in ensuring that the identified goods, works or services are the optimum resources required to achieve the goals and objectives of the SDM.
- 2.3.2. The SCM unit must analyse the goods, works or services required and execute, among others, the following:
 - 2.3.2.1. List the functions to be executed by the institution;
 - 2.3.2.2. Conduct an analysis of the past expenditure as this exercise may, among others, contribute in determining the manner in which the institution fulfilled its needs in the past; and
 - 2.3.2.3. Compile a detailed list of the goods, works or services required to execute the functions listed as per 2.3.2.1 above.

2.4. Planning to obtain the required goods, works or services

- 2.4.1. Together with the end-user, the SCM Unit should apply strategic sourcing principles to determine the optimum manner in which to acquire the required goods, works or services. This entails, among others, the following:
 - 2.4.1.1. Conducting an industry and market analysis of the goods, works or services to be obtained. This must include the determination of a reasonable price for the required goods, works or services;
 - 2.4.1.2. Confirmation that sufficient funds have been allocated for the procurement of the required goods, works or services. If this is not so, the end-user must be informed accordingly. The procurement process should not proceed if funds

are not available. Documentary proof must be obtained to substantiate the availability of budgetary provisions;

- 2.4.1.3. Considering the optimum method to satisfy the need, for example whether the procurement should be by means of price quotation, advertised competitive bids, limited bids; procuring the goods, works or services from other institutions , or on transversal term contracts nor ad hoc contracts;
- 2.4.1.4. The frequency of the requirement(s) must be established in order to determine whether it would be cost-effective to arrange a specific term contract for the goods, works or service;
- 2.4.1.5. Establishing whether it would be cost-effective to have the goods available as a store item within the institution. Should this be the case, the minimum and maximum storage levels of these items should be determined and managed; and
- 2.4.1.6. Establishing the lead time required by the potential suppliers to deliver the required goods, works or services after receipt of an official order.

3. Major Activities

- 3.1. Demand management must translate the annual plan (SDBIP) and multi-year business plan (IDP) of SDM into current and future needs. The process should consider the following as a minimum:
 - 3.1.1.1. Understanding of the current and future needs;
 - 3.1.1.2. Linking the requirements with the budget; and
 - 3.1.1.3. Ensuring that the need forms part of the IDP of the municipality.
- 3.1.2. Consideration of the optimum method to satisfy the need e.g. possibility of procuring goods and services using transversal or ad hoc contracts;
- 3.1.3. Consideration of an analysis of previous expenditure in order to determine the manner in which the particular need was fulfilled in the past;
- 3.1.4. Indication of the frequency of the specified requirement;
- 3.1.5. Assessment of available assets;

- 3.1.6. Determination of the economic order quantity;
- 3.1.7. Identification of lead and delivery times;
- 3.1.8. Planning for publication; and
- 3.1.9. Conducting an industry and commodity analysis.

3.2. The demand management function lies at the beginning of the supply chain and is a cross functional exercise which necessitates end users involvement in SCM activities and this shall be performed by a Cross Functional Sourcing Team (CFST) that consists of individuals having the relevant expertise.

3.3. The CFST composition shall be as follows:

- 3.3.1. Director: Supply Chain Management;
- 3.3.2. Director: Financial Management and Budgets;
- 3.3.3. Demand Management Specialist/ delegated official(s); and
- 3.3.4. Relevant end-users from Clusters.

- 4.2. The relevant Project Manager must ensure that the performance of all contractors is assessed during the period of the contract.
- 4.3. At the completion stage of the project/contract, an assessment of the contractor shall be undertaken and this assessment should be available for future reference.
- 4.4. Performance management shall accordingly be characterised by a monitoring process and retrospective analysis to determine whether:
 - 4.4.1. Value for money has been attained;
 - 4.4.2. Proper processes have been followed;
 - 4.4.3. Desired objectives have been achieved;
 - 4.4.4. There is an opportunity to improve the process;
 - 4.4.5. Suppliers have been assessed and what that assessment is; and
 - 4.4.6. There has been deviation from procedures and, if so, what the reasons for that deviation are.
- 4.5. The performance management system shall accordingly focus on, amongst others:
 - 4.5.1. Achievement of goals;
 - 4.5.2. Compliance to norms and standards;
 - 4.5.3. Savings generated;
 - 4.5.4. Cost variances per item;

- 5.2.1. After the completion of each contract the Contract Administrator is to develop a close-out report which shall be in prescribed format, to the SCM Unit within 14 days after the completion of the project.
- 5.2.2. The project owner must:

- 5.2.2.1. Ensure that complete documentation is produced to record and analyse performance including the planning documents;

- 5.2.2.2. Ensure that the product of the programme is documented;
- 5.2.2.3. Carry out contract closure;
- 5.2.2.4. That there is a record of formal acceptance documentation that the supplier has accepted the contract conclusion and that the lessons learnt are also documented.

5.3. Transfer And Cessation Of Contracts

5.3.1. The SCM Unit and Legal Support and Services in conjunction with the End-user department shall deal with transfer/cessions.

- 5.3.1.1. The contractual conditions should stipulate the condition under which transfer/cessions shall be considered and the process to be followed in such circumstance.
- 5.3.1.2. Application for the transfer/cession of contracts must be completed and signed by both the transferor and the transferee and countersigned by two witnesses. Full reasons for the transferring of the contract must be provided and the transferee's ability to carry out the contract must be established and reported to the Accounting Officer or his delegate. Unless it is otherwise in the best interest of the SDM, it is unlikely that the transfer will be approved if the SDM would suffer a loss as a result thereof or if there is an increased risk to the SDM.
- 5.3.1.3. Should the contract be transferred to another provider, it should be checked whether the B-BBEE Status level of contributor is less than that scored by the original contractor. Thus it should be indicated if the transfer would have had on the original award of the contract. However the circumstances leading to the transfer must be pointed out and taken into consideration.
- 5.3.1.4. The contractor will raise the issue with the End-user department in writing where after the End-user department must comment of the viability of the transfer/cession and submit the request to the SCM Unit.
- 5.3.1.5. If the transfer/cession is not viewed favourably for a justifiable reason, the SCM Unit must inform the contractor of the decision in writing and provide the End-user department with copies of the correspondence for filing purposes.

- 5.3.1.6. If the transfer/cession is viewed favourably, the SCM Unit may involve Legal Support Services for the purpose of drawing up the transfer/cession documentation if necessary. The SCM Unit must facilitate the signing of the transfer/cession by all parties, must forward a copy to the End-user department and the contractor and must file the original signed transfer/cession documentation appropriately.

5.4. **Contract Variations Amendments**

5.4.1. **General**

- 5.4.1.1. The Accounting Officer must ensure that all written contracts or service level agreements that are entered into by SDM are legally sound. This measure is aimed at avoiding potential litigation and minimising possible fraud and corruption.
- 5.4.1.2. Contracts or agreements must be properly managed in order to ensure that both parties (SDM and the contractor) meet their respective obligations.
- 5.4.1.3. All contracts must be administered by an official(s) having the necessary competencies to ensure effective management of the contract.
- 5.4.1.4. Contracts related to the procurement of goods and services will be captured on the SDM's procurement system in the form of a price schedule.
- 5.4.1.5. The use of fixed price, fixed term contracts will be promoted and expenditure will be driven towards contracts versus once-off purchases.
- 5.4.1.6. Contract price adjustments shall be processed only in accordance with contract terms and conditions.
- 5.4.1.7. When an item on contract is no longer available and another item has to be substituted, this implies an amendment of the contract. Such an amendment must be submitted to the BAC for approval. When a contractor is no longer able to supply a contract item and he offers to substitute, an item which is more expensive, the amendment is to the disadvantage of the SDM unless the substitute item offers additional benefits which can be utilised by the SDM and which justify the additional cost. If not, the applicable BAC or delegate's approval must be obtained.

- 5.4.1.8. Contracts may be expanded or varied by not more than 20% for construction related goods, services and/or infrastructure projects and 15% for all other goods and/or services of the original contract value.
- 5.4.1.9. Any expansion or variation in excess of these thresholds must be dealt with in terms of the provisions of section 116(3) of the MFMA which will be regarded as an amendment to the contract.
- 5.4.1.10. The contractual conditions should stipulate the conditions under which amendments shall be considered and the process to be followed in such circumstances.
- 5.4.1.11. No variation in or modification of the condition of contract shall be without all the parties signing the amendment.
- 5.4.1.12. The End-user department must approach the SCM Unit with the request for amendment. The SCM Unit should contact the contractor to determine whether he will be amenable to an amendment to the contract within the allowable parameters.
- 5.4.1.13. The Legal Support and Services in conjunction with the SCM Unit must facilitate the signing of the amendment by all parties. A signed copy must be forwarded to the End-user department and the Records Department must file the original signed amendment appropriately.

5.4.2. Increase/Decreases In Quantities

- 5.4.2.1. Before calling for bids, care must be taken to establish the quantities/range of services required as reliably as possible so that the need to increase/decrease quantities/range of services during the contract period may be decreased provided that consensus exists between the SDM and the contractor and the unit prices remain unchanged.
- 5.4.2.2. After the original or official amended quantities/services for which the contract was arranged, have been delivered, the contract ceases to exist. It is then no longer possible to purchase further items/services on the contract.

5.4.3.Extension Of Contract Period

- 5.4.3.1. Extension of contract periods is undesirable because it often leads to uncontrolled increases in the contract prices. These must therefore be restricted to the minimum. The End-user department is responsible for ensuring that timely application is made for the arrangement of new contracts. Where justifiable reasons are provided for extending a contract, the relevant application may be considered favourably and contracts may be approached with the request to indicate whether they are prepared to extend the contract period.
- 5.4.3.2. The fact that extension of contracts might affect the schedule for other contracts must also be borne in mind.
- 5.4.3.3. If contractors are prepared to extend the contract period, but with amended price conditions, the reasonableness of prices must be established.
- 5.4.3.4. The cost of extending the contract must be limited to either 15% in the case of construction contracts or 20% in any other contract, of the original contract value. However, the market must again be tested before the extended period has expired.

5.4.4.Extension Of Delivery Periods

- 5.4.4.1. Motivated applications for the extension of delivery periods in respect of ad hoc and specific term contracts may be considered favourably, but are subject to the restriction that no price adjustments, which arise during the extended period, may be considered. However, price adjustments during the extended period may be considered favourably if the SDM requested the extended delivery period, or when delayed deliveries are caused by the actions of the SDM.

5.4.5.Amendment Of Specifications

- 5.4.5.1. Where a binding contract has been concluded, an amendment of specifications whether initiated by the contractor or by the SDM, can be made

only after the negotiation between the contractor and SDMM, through the AO and must be immaterial. Records of that meeting should be kept for reference.

- 5.4.5.2. Account must be taken of the fact that the contractor has a right of recourse against the SDM if the specifications have to be amended as a result of a mistake by SDM. It is essential therefore that a settlement is reached with the contractor.

5.4.6. Unsatisfactory Performance

- 5.4.6.1. Unsatisfactory performance occurs when performance is in accordance with the contractual conditions. Directives regarding action in such cases appear in paragraph 15, 21-23, 26 and 28 of GCC.
- 5.4.6.2. The End-user department must timely identify unsatisfactory performance in terms of the contract.
- 5.4.6.3. The SCM Unit must, in consultation with the End-user department and legal department if required, bring unsatisfactory performance to the attention of the contractor in writing. Also apply the audi alteram partem rule (hear the other side) in the management of unsatisfactory performance. The SCM Unit shall give notice to the contractor of action to be taken in line with the contract due to non-performance.
- 5.4.6.4. If the performance is not rectified, the End-user department must inform the SCM Unit of this fact.
- 5.4.6.5. Before action is taken in terms of GCC or any other special contract condition applicable, the SDM must warn the contractor in writing that action will be taken in accordance with the contract conditions unless the contractor complies with the contract conditions and delivers satisfactory supplies or services within a reasonable time. In the contractor still does not perform satisfactorily despite a final warning, the SCM Unit may make a recommendation to the AO, as delegated by Council, for the appropriate penalties to be introduced.
- 5.4.6.6. When correspondence is addressed to the contractor, reference must be made to the contract number, the item number and the number and date of any relevant invoice, statement or letter received from the contractor.

Otherwise the number and date of the order, a short description of the product or service and details of the destination if applicable, must be supplied.
